

Cloud-Series Network Racks

Product Overview

Front View

Cloud-Series Network Racks offer a high-quality and secure design which minimizes installation time and reduces costs while providing a flexible solution for IT network closets. Highlights include:

- Pathways for cable integration at the top and bottom of the enclosure to accommodate large connectors and cable loops
- Options to configure mounting rails, PDU's, doors, side panels, cable management and airflow management solutions
- High-quality, tempered glass door for greater visibility of critical network equipment

Benefits

Supports Larger Equipment	800kg load rating and up to 1000mm depth suitable for common IT equipment
Reliable Operation	Fully-assembled, bolted frame provides greater support
Greater Security	Locking doors and side panels prevent unauthorized access
Maximum Organization	High density vertical cable management for organizing network and power cables
Office Friendly	Attractive, tempered glass door suitable for office applications
Greater Access	360° equipment access via removable side panels and doors for simplified maintenance
Greater Airflow	Roof-mount fans support higher-powered equipment
Flexible Operation	Locking castors and mounting feet can easily transport. Easy assemble flat pack options.
Greater RMU Capacity	4-post mounting rails provide front and rear equipment installation

Best-in-Class Organization

Removable, side panels for greater equipment access

Easily adjustable mounting rails

Top panel with integrated fan for higher airflow

Solid, locking rear door

Network Rack

Specifications

Frame View

Each Network Rack Includes:

- Bolted frame cabinet with 800kg load rating (SPCC)
