

A Single DCIM System for Your Multi-Vendor Environment

Vendor-Agnostic DCIM So You're Never Locked In.

Sunbird's Data Center Infrastructure Management (DCIM) solution supports over 50 vendors natively and/or via plugin so you're free to choose the devices that work in your environment and manage them all in a single system.

- **Native support** helps you get up and running faster. Out-of-the-box support for these vendors and their devices comes standard in Power IQ®—no additional user installation or configuration required. Native support is production-hardened by our lab engineers and field-tested by hundreds of users like you.
- **Plugin support** enables you to manage a wider range of vendors and devices in your data centers. Plugins are developed by and distributed through our plugin community free of charge. Get access now to our free library of over 60 existing plugins that can be modified and installed at addons.sunbirdcim.com.

Sunbird Software is changing the way data centers are being managed. With a focus on real user scenarios for real customer problems, we help data center operators manage tasks and processes faster and more efficiently than ever before, while saving costs and improving availability. We strive to eliminate the complexity they have been forced to accept from point tools and homegrown applications, removing the dependency on emails and spreadsheets to transform the delivery of data center services. Sunbird delivers on this commitment with unexpected simplicity through products that are easy to find, buy, deploy, use, and maintain. Our solutions are rooted in our deep connections with our customers who share best practices and participate in our user groups and product development process.

Based in Somerset, NJ, Sunbird serves nearly 1,000 DCIM customers worldwide. For more information, please visit SunbirdDCIM.com.
